Why is the solution for meetings of the Management Board and Supervisory Board suitable for companies of all sizes?

It is a common belief that the automation functioning is only suitable for large companies, but the truth is that it is necessary and very useful for companies of all sizes that which have a corporate governance process in place.

Smaller companies are usually of the opinion that setting up of a system would be some luxury. However, when they find that the price of the system for the general manager is less than a cup of coffee daily, they usually change their mind. For smaller companies which do not have much administrative staff and infrastructure, the solution is even more useful than for large companies.

People never want change, but when customers find out how useful the solution is, they do not want to go back to the old system. The process of changing work from paper to system solution is very straightforward, especially for smaller companies, so there is no reason to worry.

The use of technology helps to increase efficiency, improve safety, reduce costs and, in particular, change work processes. Everybody will use less time for administrative works. Undoubtedly, the company will become more efficient, and the members of the management and supervisory boards will be better prepared for the meetings.

THREE REASONS WHY the solution is beneficial to companies of all sizes:

1. **Savings in time with administrative works**

   Distribution of the meeting documentation to the members of the Management Board or the Supervisory Board by e-mail or regular mail is time-consuming. Especially if the documentation is being updated. Your company will save a lot of time by switching to our solution.

2. **Improved business efficiency**

The benefits of using the solution are evident both before and after the meeting. Members of the Management Board and the Supervisory Board use the portal for taking notes, correspondence voting, and reviewing archival documents and resolutions. They may also electronically confirm meeting minutes.
Documents are always available – even offline in a secure environment. Organizations are quickly recognizing the benefits of saving board members' time merely through more efficient document distribution and improved communication. The entire organization will become more efficient.

3. Sharing documents and participating in a secure environment

Sending the documentation by email or courier can mean losing control over the process of sending the most important company documents. It is challenging to know whether only the recipients received the documentation and what happened to the documentation after the receipt by the recipients. With our solution, the secretary has complete control over the distribution of all documents, and everything is sent encrypted via a secure platform. Recipients may only be users of the solution, to which they are entitled. There can be no incorrectly transmitted email or lost documents on the go. This is important for companies of all sizes.

The implementation of the system solution is important for companies of all sizes. You can be sure that you will not be sorry.
